

THEMATIC STRATEGY ON SOIL PROTECTION

CONTENT OF THE THEMATIC STRATEGY

We propose for the TS to be adopted by end 2005

STRUCTURE OF THE MAIN BODY OF THE SFD

ARTICLES

- **OBJECTIVES** of the Framework Directive
- DEFINITIONS
- COMPETENT AUTHORITIES to be defined by MS
- **WORKING UNIT** for the different threats
- INTEGRATION of soil aspects in sectoral policies (by MS)
- PRIVATE OWNERSHIP- DUTY OF CARE,
- AWARENESS RAISING for MS to establish structures, improve knowledge transfer etc.
- PUBLIC PARTICIPATION
- COMMITTEE

CONTENT OF SOME ARTICLES OF THE MAIN BODY

Objectives

Establish **COMMON PRINCIPLES**, prevent the **THREATS**,
preserve **SOIL FUNCTIONS**, ensure **SUSTAINABLE USE**

Working unit

RISK AREA for certain threats (erosion, organic matter decline,
salinisation, compaction, landslides)

NATIONAL /REGIONAL approach for other threats
(contamination, sealing)

SOIL THREATS ADDRESSED BY THE SOIL FRAMEWORK DIRECTIVE

Regional/national approach

CONTAMINATION

SEALING

Risk area approach

EROSION

ORGANIC MATTER DECLINE

SALINISATION

COMPACTION

LANDSLIDES

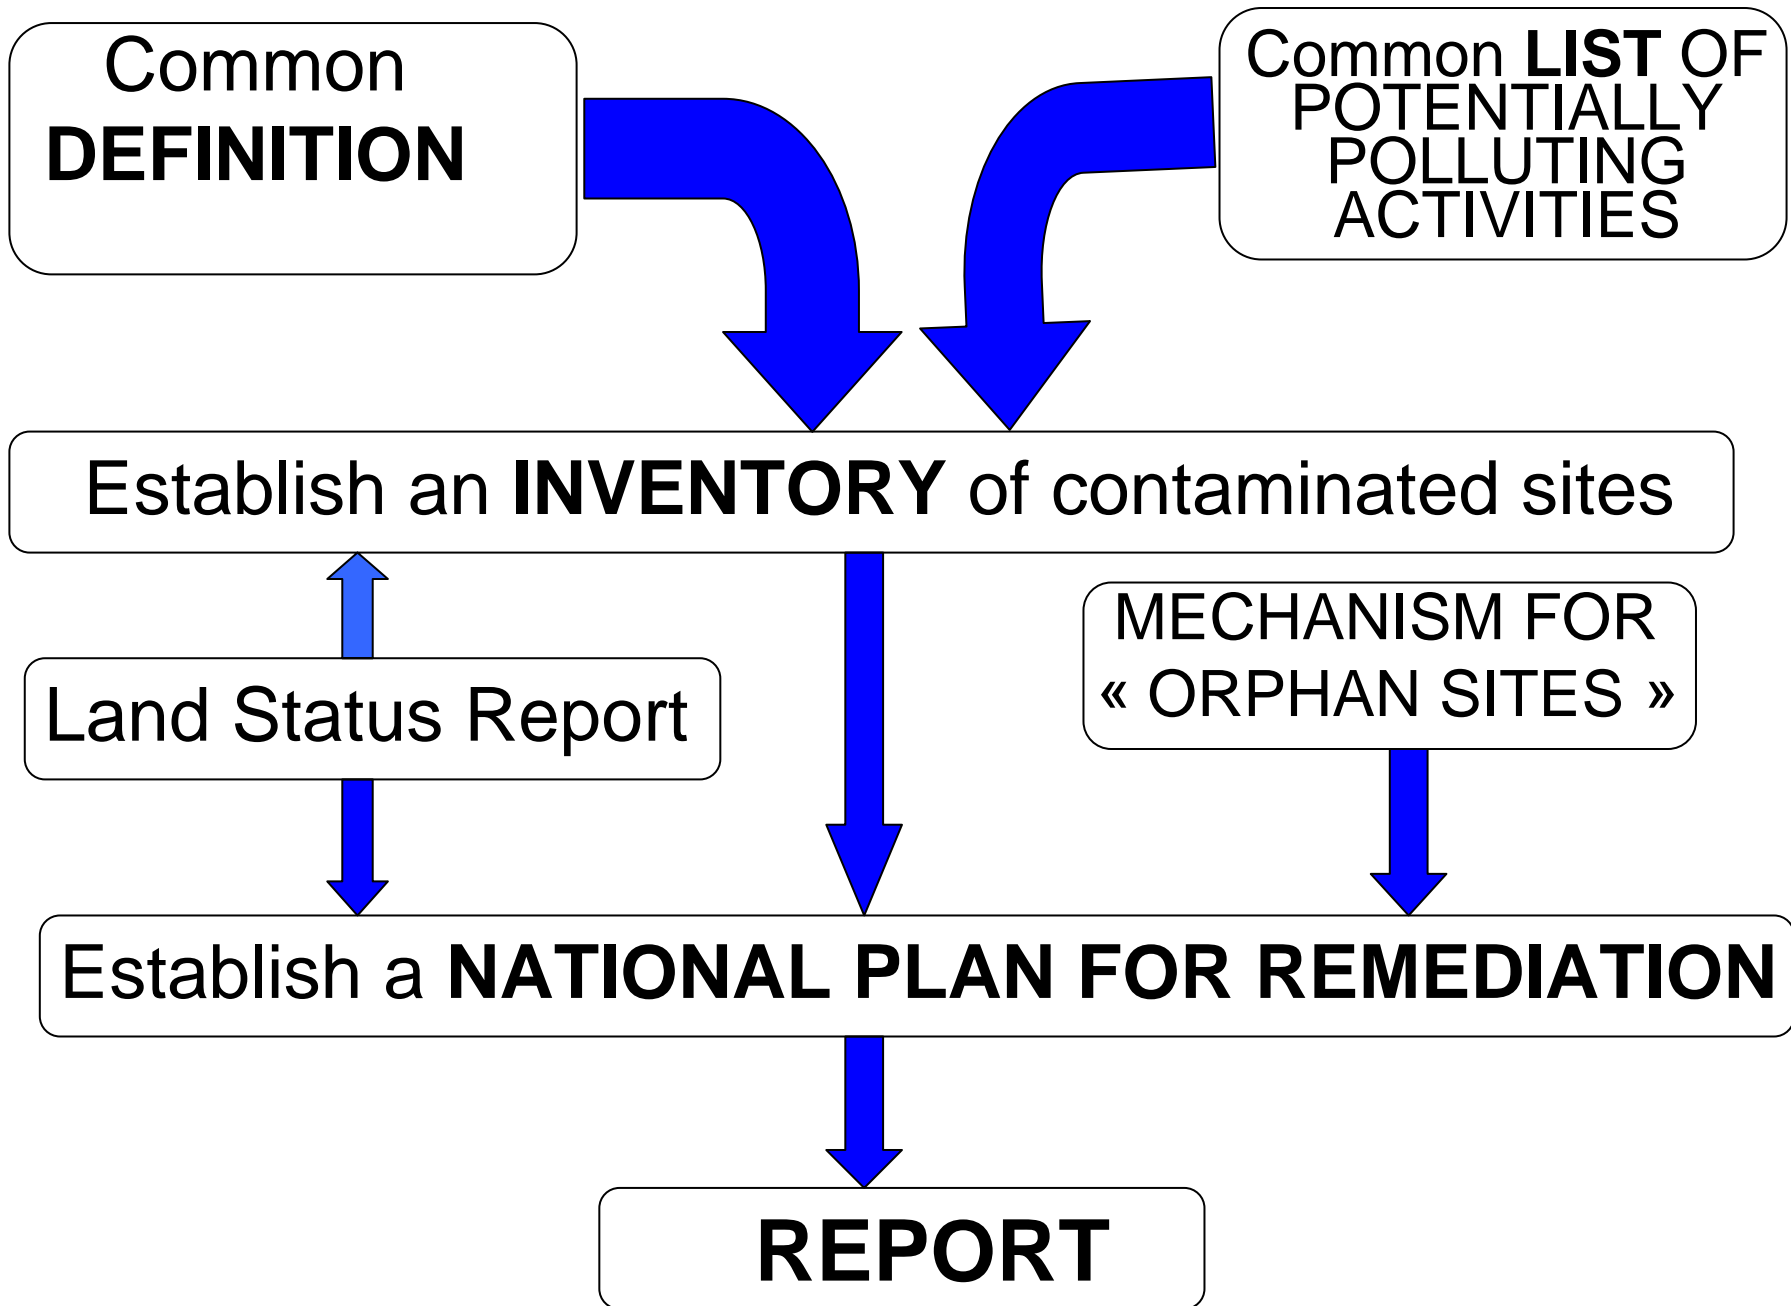

CONTAMINATION

- **DEFINITION:** contamination posing a risk to human health and environment, taking into account current and intended use.
- **LIST OF POTENTIALLY POLLUTING ACTIVITIES:** to be established on Community level (Annex to the Directive).
- **INVENTORY OF CONTAMINATED SITES** to list all contaminated sites by MS, to be regularly updated.
- **NATIONAL REMEDIATION PLANS** to be established by MS, containing targets, means, and prioritisation, to be regularly revised
- **STATUS REPORT** will be necessary for land where a potentially soil contaminating activity takes place or has taken place.

CONTAMINATION

- **MECHANISMS TO FUND THE REMEDIATION OF ORPHAN SITES** to be established by MS
- **HARMONISATION OF RISK ASSESSMENT METHODOLOGIES** to be facilitated by the Commission and if necessary.
- **REPORTING** on inventory of contaminated sites and remediation plans.
- **Modification of IPPC Directive (not now, but at next revision)**
 - Harmonisation of “cessation of activities and return to a satisfactory state”
 - Establishment of soil monitoring during activity of IPPC installations

How would you rank the importance of preventing and mitigating soil degradation in the EU?

	Number of requested records	% Requested records	% of total number records
very important			(67.8%)
important			(23.2%)
important but less than other environmental problems			(8.1%)
not at all important			(0.6%)
I don't know			(0.2%)

Although soil type and characteristics are very variable across Europe, it is subject in many countries to the same problems. Soil is a static media, nevertheless, soil degradation has transboundary impacts. Against this background which of the following courses of action is the most appropriate?

	Number of requested records	% Requested records	% of total number records
a framework is developed at EU level and measures are established at national/local level			(74.6%)
all measures are established at EU level			(16.4%)
no action is taken at EU level			(4.8%)
I don't know			(4.1%)

Results of the Internet Consultation **CITIZENS- 1206 replies**

A potential buyer of a parcel of land is entitled to know if a soil polluting activity took place or is taking place in the site.

	Number of requested records	% Requested records	% of total number records
I agree fully			(89.1%)
I rather agree			(9.8%)
I rather disagree			(0.5%)
I disagree completely			(0.3%)
I don't know /No opinion			(0.3%)

If there is/has been a soil polluting activity on the site, the potential buyer of that parcel of land is entitled to have a report of the state of the soil therein (a validated report provided by the land seller)

	Number of requested records	% Requested records	% of total number records
I agree fully			(82.1%)
I rather agree			(14.6%)
I rather disagree			(2.2%)
I disagree completely			(0.8%)
I don't know /No opinion			(0.2%)

Results of the Internet Consultation **CITIZENS-** 1206 replies

Every Member State must establish an inventory of contaminated sites in their national territory.

	Number of requested records	% Requested records	% of total number records
I agree fully			(78.4%)
I rather agree			(18.2%)
I rather disagree			(1.7%)
I disagree completely			(0.8%)
I don't know/No opinion			(0.8%)

The inventory of contaminated sites should be made available for the public to consult

	Number of requested records	% Requested records	% of total number records
I agree fully			(78.1%)
I rather agree			(16.3%)
I rather disagree			(3%)
I disagree completely			(1.3%)
I don't know/No opinion			(1.2%)

Results of the Internet Consultation **CITIZENS-** 1206 replies

On the basis of the inventory produced, every Member State must establish a plan for the remediation of the contaminated sites identified.

	Number of requested records	% Requested records	% of total number records
I agree fully			(71.8%)
I rather agree			(21.6%)
I rather disagree			(4.2%)
I don't know/No opinion			(1.3%)
I disagree completely			(1.1%)

In the views of your organisation, or your expert view, the definition of a contaminated site should be based on

Requested records number records	Number of requested records % of total	%
risk to human health and the environment		(74.2%)
concentration levels for contaminants		(23.8%)
I don't know		(1.5%)

Please indicate to which extent you agree with the following statement: A potential buyer of a parcel of land is entitled to know if a soil polluting activity took place or is taking place in the site.

Requested records number records	Number of requested records % of total	%
I agree fully		(87.5%)
I rather agree		(11.3%)
I disagree completely		(0.5%)
I rather disagree		(0.2%)
I don't know/No opinion		(0.2%)
