Vopak

How can we control quality ?

- Formulate & certify the protocols
- Certify the apparatus
- Certify the technique
- Certify the consultant
- Overview by independent reviewer

Fear:

certification will hinder innovation

What triggers innovation?

- Costs reduction
- Blue sky projects
- Fall back scenario should be included
- Tech development including research bodies, industry and consultants

What would Nicole want ?

- Transfer of knowledge and expertise
- Training of consultants & regulators
- Flexibility
- Little administrative burden
- Focused quality control not running wild
